Academic Project

- **Main Project: FABRICATION OF REVERSE GEAR IN TWO WHEELER**

In fast growing modern world many types of vehicles are being innovated. But At present there is no system available to back the vehicle. When the front wheel get into trench it is very difficult to take the vehicle from parking, traffic block .There are already such mechanism is implemented in gearless two wheeler, for handicapped people .At earlier period our scientist discovered the reverse gear mechanism . To eliminate this problem we invent the reverse gear mechanism in two wheeler Even normal peoples can easily reverse the vehicles without getting down from the vehicle by easily operating hand lever. The project title is “FABRICATION OF REVERSE GEAR IN TWO WHEELER ”. The main objective of our project is to facilitate, comfort ability and safety” to the peoples. This project requires the moped bike, lever, reverse gear box, sprocket and other necessary parts. When need to reverse the vehicles they can engage the hand lever for reverse gear, the vehicle moves backwards. This project will be more useful for the normal peoples in the society.
